

AutroMaster V - monitoring and presentation of your fire detection system made easy

AUTROMASTER V

AUTROMASTER

**Monitoring and presentation of
your fire detection system
made easy**

Our goal was to develop and offer continuous and real time monitoring and presentation of fire alarm systems, that was user-friendly and affordable, yet powerful, flexible and scalable.

We are proud to introduce the AutoMaster V, a new way for improved safety, control and risk management.

Mixed developments

Schools

Hotels

Apartment buildings

Cultural buildings

Banks

Warehouses

Hospitals

Data centres

TAILORED TO PROTECT

When time is short

In critical situations, evacuations or terror response, trained personnel, tuned procedures, and information in real time is invaluable.

With its easy set-up and no need for specialized personnel to operate, the new AutoMaster V is applicable for protection of most types of buildings and applications, from schools and apartment buildings, to hospitals and mixed developments.

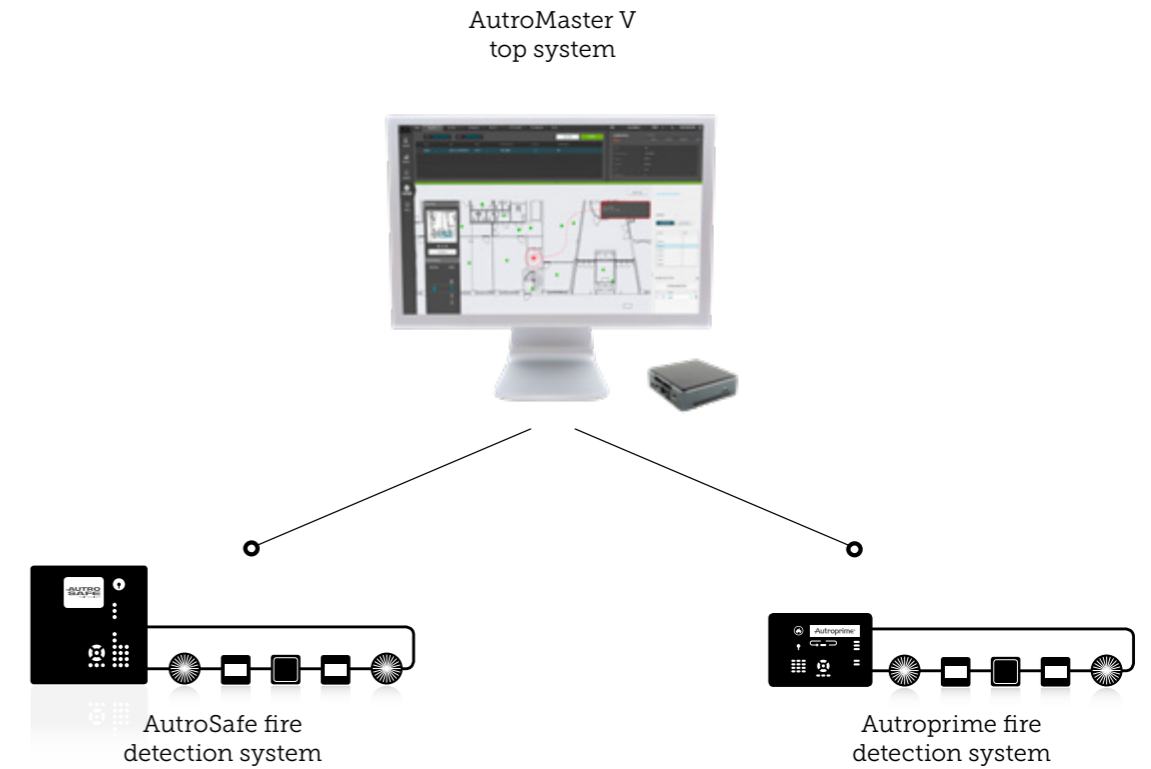

Intuitive and user friendly system design

Easy configuration method

Direct import of CAD drawings of building

Extensive functionality

HIGH-END SAFETY ON A BUDGET

AutroMaster V provides high-end safety and risk management, optimized to perform with our AutroSafe and Autroprime fire alarm systems.

Flexible software provides tailored functionality for any installation, and even more functionality can be added after installation.

AUTROMASTER V

Intuitive and user-friendly system design

- Client and server model, not like today's master/slave
- Both panels and presentation act as clients
- Clients can communicate with several servers
- Very scalable and network friendly
- Servers can be established locally, remote or both

Easy configuration method

- Server can read running configuration from panel
- AutoMaster V can read configuration directly
- Working with updates is simplified
- Updated configuration is running immediately

Direct import of CAD drawings

- New vector graphics engine
- AutoCAD and MicroStation file format
- Location of units can be positioned and labelled while drawing with CAD software
- Drag & drop the layers you need from the CAD file
- Version control

Extensive functionality

- Floor maps (GUI) fully customizable
- Multiple reports
- Enabling and disabling of detector and unit groups
- Change of performance class

THINKING NEW THOUGHTS IS PART OF OUR JOB.

That is how we create products that make you feel safe.

Autronica Fire and Security AS is a leading innovator, manufacturer and supplier of fire, safety and maritime measuring equipment worldwide.

Our products ensure safety in applications on land, sea and in the petrochemical, oil and gas sectors.

Owned by United Technologies Corporation (UTC), we employ more than 500 people handling the complete value chain, from idea, development and manufacturing to the marketing, sales and servicing of our products.

We are an international company with worldwide offices and our HQ is located in Trondheim, Norway's technology hotspot.
