AutroPoint HC200

Infrared Hydrocarbon Gas Detector Product datasheet

Features

- Superior optics protection system
- No undisclosed failure modes
- SIL 2 model certified to IEC 61508 by exida®
- Routine calibration not required
- Explosion-proof, stainless steel housing with tethered weather protection baffle
- Integral wiring compartment eliminates need for external junction boxes
- Built-in tri-color LED eliminates need for external display module
- Built-in optional relay package eliminates need for external relay output module
- Non-interfering HART communication capability
- Optional Intrinsically Safe HART communication port
- Optional hand-held HART communicator enables field configuration and calibration
- Optional model AV20 Universal Display for remote calibration
- Heated sapphire optics deliver long-lasting, high performance detection capability
- Immune to damage from exposure to constant background gases or to high gas concentrations
- FM, CSA, DNV/MED, DEMKO and CE (including ATEX 94/9/EC) certifications
- Certified to FM/CSA Div. 1 and DEMKO Ex d, e protection standards for maximum versatility.
- Gas performance verification by FM/CSA/ DEMKO.
- Certified factory set and calibrated to methane, propane, ethylene, or butane
- Faster response output option available

Application/Description

The AutroPoint HC200 is a diffusion-based, infrared combustible gas detector that provides continuous, fixed monitoring of flammable hydrocarbon gases from 0 to 100% Lower Flammable Limit (LFL). Standard device outputs include an electrically isolated 4-20 mA signal with HART communication protocol, and RS-485 serial communication. Serial communication protocols supported include MODBUS and ASCII. An optional relay output board with two programmable alarm relay outputs and one fault relay output is available.

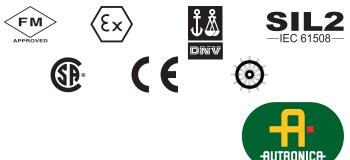

An optional AutroVu Explosion-Proof Universal Display Unit Model AV20 can be used for remote calibration.

Ideally suited for protection of challenging on/offshore oil and gas facilities and other downstream hydrocarbon applications, the HC200 is globally certified for use in Class I, Divisions 1 and 2, and Zones 1 and 2 hazardous areas. In addition, the stainless steel construction, sapphire optics, and modular design all combine to deliver industrial grade hardness along with easy installation and the lowest cost of ownership available.

The AutroPoint HC200 is capable of detecting hundreds of flammable hydrocarbon gases and vapors. The detector is performance certified to methane, propane, ethylene, and butane, and is shipped from the factory set and calibrated to one of these gases. Numerous additional operating parameters are programmable via digital communication or the optional hand-held communicator.

For details regarding versions and article numbers, please contact our sales department or see our product catalogue.

Protecting life, environment and property...

Specifications

Input Voltage	24 Vdc nominal. Operating range is 18 to 32 Vdc. Ripple cannot exceed 0.5 volt P-P.			
Power Consumption	4.0 watts nominal @ 24 Vdc 7.5 watts maximum @ 24 Vdc 10 watts maximum @ 32 Vdc.			
Short Circuit Current	lsc: Isc (fuse): Power Supp	oly Max Vo	5.4 ampe 3.1 ampe oltage: Um = 250	res.
Warmup Time	Two minutes from cold power-up to normal mode; 1 hour minimum recommended.			
Current Output Relays (opt.)	Linear 4-20 mA (current source/sink, isolated/ non- isolated) rated at 600 ohms maximum loop resistance @ 24 Vdc operating voltage.			
Temperature Range	Operating: -40°C to +75°C (-40°F to +167°F). Storage: -55°C to +85°C (-67°F to +185°F).			
Humidity	0 to 99% R.H. (Company verified). 5 to 95% R.H. (FM/CSA/DEMKO verified).			
Detection Range	0 to 100% L Other range			
Detectable Gases	Most flammable hydrocarbon vapors are detectable. HC200 is performance certified to methane, propane, ethylene, and butane, and is shipped from the factory set and calibrated to one of these gases.			
			gases, configur I device calibrati	ation using on are required.
